

BXTR 4021
PATENT

Amendments to the Specification:

Please revise the first sentence of paragraph 3 to read as follows:

- - One example in the medical context is when two flowable medical ~~two~~ medical products (e.g., liquids and mixtures of liquids and solids) need to be delivered to the patient at the same time, but the two products cannot be sterilized in the same way. - -

Please revise paragraph 16 to read as follows:

- - In another aspect of the invention, a method of heating sealing a section of tubing generally comprises placing a portion of the tubing section to be heated sealed in contact with an energy absorption member. A beam of electromagnetic energy is directed onto the energy absorption member. The energy absorption member is constructed for absorbing energy from the beam. Heat is transferred from the energy absorption member to the tubing section portion by contact therewith to melt the tubing section portion. - -
